Summary

Motivated M.Sc. Data Science & Applied Statistics student with strong knowledge of machine learning, statistical analysis, Python, R, and data visualization. Passionate about solving real-world problems using AI and data-driven approaches. Seeking an entry-level Data Scientist position to apply analytical and programming skills in a professional environment.

Education

- - 2027

Central University Of South Bihar

M.Sc. Data Science And Applied Statistics • Master In Science

Percentage - 80% • CGPA - 8

2022 - 2025

Indira Gandhi National Open University

Bachelor Of Science In General (BSCG) • Bachelor Of Science (BSc)

I have a strong foundation in core mathematical concepts, including linear algebra, calculus, probability, statistics, and optimization. These concepts enable me to analyze complex datasets, develop machine learning models, and solve real-world analytical problems. Through my academic studies in Data Science and Applied Statistics, I have strengthened my quantitative reasoning, logical thinking, and problem-solving skills, allowing me to approach data-driven challenges with confidence and accuracy.

Certification

NPTEL Certification – Database Management Systems (DBMS)

Successfully completed the NPTEL certification course in Database Management Systems (DBMS), gaining a strong understanding of relational databases, SQL, normalization, ER modeling, transaction management, indexing, and query optimization. This certification strengthened my ability to design, manage, and analyze structured databases for data-driven applications.

Natural Language Models for Language Technology Development

Successfully participated in the ACM India Summer School on Natural Language Models for Language Technology Development hosted by IIT Guwahati.

Gained practical knowledge of Natural Language Processing (NLP), transformer-based language models, tokenization, machine translation, automatic speech recognition, and large language models (LLMs).

Enhanced skills in Python-based NLP workflows, text processing, and modern AI techniques for language technology applications

Skills

- Database Management System
 - Python
 - R Programming
 - Tableau
 - SPSS
- Advance Statistics
 - Advance Excel
 - Linux

Projects

Sentiment Analysis on Text Data

Developed a sentiment analysis model to classify text into positive and negative sentiments using machine learning techniques.

Performed text preprocessing, including tokenization, stopwords removal, text normalization, and TF-IDF feature extraction.

Implemented and trained a Logistic Regression classifier for sentiment prediction.

Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix.

Tools & Technologies: Python, Pandas, NumPy, Scikit-learn, NLTK, Matplotlib.
